

Internships

Nezinscot Farm is now seeking interns for Summer & Fall. If you are interested in spending a summer, semester or year at Nezinscot Farm learning how to farm and live organically, please fill out an [Application](#) and direct any questions to Gloria.

Internship Duration – Seasonal and Year long opportunities, negotiable– Full details below

Age: 18 and older

Number of Interns: 3

App Deadline: Flexible

Minimum Length of Stay: Negotiable

Meals: We cook a variety of meals, always using fresh local and farm grown ingredients. You never have to worry about going to the grocery store when you live here!

Skills Desired: We're happy to teach new and aspiring young adults what we know; a willingness to learn, patience, ability to work as a team, self-motivated and positive attitude.

Stipend: Dependent on duration of internship

Housing: We have furnished apartments, intern only bathroom/shower room, laundry facilities, free Wi-Fi and great company.

Internship Details: Interns will work along with us 5 - 6 days a week for 40 + hours a week with a full day off every week. Daily tasks are diverse - weeding, harvesting, washing, landscaping, planting, chicken duty, milking, and cheese making are just a few examples of tasks to be accomplished on the farm.

1.) Dairy: Duties include milking and tending to the needs of the goat herd, feeding, healthcare, managing production, and learning/making cheese on a daily/weekly basis. This individual must have a passion for the art of cheese making. You will learn every step of the process including the recipes and techniques for making some of the most popular cheese varieties out there.

There are only two spots available for this internship. The duration of the program is end of April to beginning of October.

2.) Gardening & Food Preparation: Assistant to vegetable production in our gardens and greenhouse- this involves preparing soil, planting, weeding, managing, harvesting, drying, preserving and canning. Must have a passion for working with food from start to finish. This individual will get hands on experience working a biodynamic garden with a variety of veggies, fruits, medicinal and culinary herbs. The duration of the program is end of May to beginning of November.

3.) Fiber: This individual will be in charge of the sheep, llamas, and angora goats and rabbits. Managing their health, grooming and shearing. They will also be fully involved in all fiber products production including dyeing, carding, weaving, felting, rug hooking, needle felting etc. The duration of the program is end of June to beginning of November.
